#### Point Schedule for Judging Meat Pens

Meat Type .....	40 points
Condition of Flesh .....	30
points	
Uniformity of Body and Weight .....	20 points
Fur .....	10 points

Meat Type – 40 Points: Type is the most important factor in judging these pens. The best meat type is found in those fryers that are compact and short, with the body well filled, rounded, and solidly fleshed. Smooth, well filled hips and good depth of body are especially important. Protruding hip bones or prominent "razor backs" are serious faults. The width and depth of loin, thickness of the hindquarters, and

well-developed shoulders are important to the meat carrying type of the fryer. The hindquarters are most important, loin second, and forequarters are third in importance.

**Condition – 30 points:** All fryers in a pen must be in prime condition. This reflects the care and management practices of the breeder. The fryers must be firm and solid. They must not show any signs of flabbiness, softness, or looseness. The pelt must be tight over the body and the animals must be clean and show no signs of neglect or disease.

**Uniformity – 20 points:** This is a combination of the other three requirements. It denotes the ability of the breeder to pick three fryers for each pen which have the other three qualities in equal amounts, and will reflect the general quality of the herd from which they came. Uniformity must be present in weight, size, appearance, condition, meat type, fur and should be as similar in all respects as possible.

**Fur – 10 points:** Fur should conform to the breed description in the Standard and be uniform on all three animals in the pen.

**Disqualifications from Competition – All ARBA**

**Disqualifications from Competition**

**and breed Disqualifications from Competition apply to each meat pen, with the following exception:**

**Body smut on Californian or Himalayan marked animals.**

**Non descended testicles on bucks.**

**Note: On Californian meat pens and single fryer, the frosting due to genetic characteristics or nest box chilling shall not be a disqualification. Such animals are to compete as if their**

**pelts were white, as called for in the standard.**

**If any rabbit in the pen is overweight or underweight, the entire pen is Disqualified from Competition.**

**If any rabbit in the pen is Disqualified from Competition, the entire pen becomes disqualified.**

**All ARBA General Faults apply to each meat pen.**
